

CSC 133
Attendance Quiz 5 (25 points)
(Spring 2019)

Student Name: _____

Please write a CN1 program using the description below:

Describe below is a structure of a program which implements a Graphical User Interface (GUI) consisting of a form with the following layout and event handling functionalities.

Pointer Handling

The handling for the events are satisfied by the `System.out.println` text displaying of which event takes place "Pressed from the EAST region", "Dragged from Center region", "Released from the West region". You are required to output ONLY one action event per region.

Here is an example of an output: (DEMO ONLY - DO NOT USE THIS FOR YOUR WORK)
